SARAH REED

Louisville, CO | 303-956-4348 | sarahbreed01@gmail.com | www.sarahreed.art

PROFESSIONAL SUMMARY

Data analyst and visualization specialist with 5+ years of experience helping mission-driven organizations understand and communicate complex data. Skilled in building interactive dashboards and front-end data visualizations using Python, R, JavaScript, D3, and React, with a strong background in data cleaning, analysis, and stakeholder communication.

TECHNICAL SKILLS

Data Analysis & Visualization: Python, R, D3.js, Tableau, Excel, Google Sheets, RShiny
Front-End Development: JavaScript, HTML, CSS, React, Flask, Node.js, ArchieML, Git
Design & Communication: Adobe Illustrator, InDesign, Photoshop, stakeholder reporting, process documentation

PROFESSIONAL EXPERIENCE

Perls Foundation | Program Officer *2025–present*

- Support a global health foundation's grantmaking work focused on equitable access to medicines, serving as a relationship manager for grantee partners.
- Assess grantee needs, monitor program progress, and develop recommendations to inform funding strategy.
- Represent the foundation at industry conferences and convenings to track developments in the global access-to-medicines movement.

Freelance | Data Analyst / Visualization Developer *2024–present*

- Partner with mission-driven nonprofits and foundations to design and build data visualizations that communicate program impact clearly to diverse audiences.
- Produce annual report data packages — including charts, infographics, and narrative data summaries — for nonprofit clients communicating outcomes to donors and stakeholders.

Crow Insight | Data Analyst / Visualization Developer *2019–2024*

- Processed and cleaned data using Python, R, and Excel; built automated pipelines to ingest, audit, and transform client data into analysis-ready formats.
- Designed and built 10+ interactive data dashboards and visualizations using D3.js, React, R/RShiny, and Python/Flask.
- Lead developer on EPA data dashboards visualizing water system health across the U.S.; dashboards enabled citizens and scientists to explore data through intuitive filters and visualizations built to WCAG accessibility standards.
- Built public health workforce dashboards for the DeBeaumont Foundation, enabling policy makers, researchers, and citizens to analyze complex survey data.
- Managed internal IT infrastructure projects.

Farm Design | Program Manager / Mechanical Engineer *2010–2015*

- Managed $250K+ medical device development projects from concept through mass production.
- Coordinated with clients, manufacturers, and cross-functional teams to meet deadlines and budgets.
- Led design reviews, brainstorms, and task assignments across project teams.
- Managed analysis and communication of test data outputs to team members and clients.
- Served as liaison between patent holders and manufacturing teams.

R & R Woodworking | Owner / Operator *2003–2005*

- Designed and crafted custom wood cabinetry and furniture for private clients with emphasis on craftsmanship and precision.

VOLUNTEER & COMMUNITY LEADERSHIP

Chaffee County Community Foundation | Treasurer *Current*

- Oversee financial reporting, budget management, and compliance for a community-serving nonprofit organization.

Additional volunteer roles: Habitat for Humanity-Construction Volunteer; FIRST Robotics- Mentor
